#### NEW CLASSES- CONVERSATION BASED

Develop your French language skills in small groups, where emphasis is on **conversation, discussion and interaction** and providing the opportunity **to use French in meaningful ways** whilst **being given feedback and guidance in pronunciation and expression** to help in developing conversation and communication skills. These classes have been included in response to feedback from past and current students who "just want to speak French within everyday social situations".

## French classes 2018: July to December

The course structure now in place will provide greater flexibility for staff and students and students may do 2 or more classes per week and /or take 5 week breaks (by missing a 5 week module) and then continue on an as-need basis. Courses are not progressive, each lesson being a stand-alone theme. These classes are available in the daytime and at earlier times in the evening if that suits the students enrolled.
